
Identification of the participant

- Participant Name: Daniel Ferreira Polónia
- Academic Degree: PhD
- Academic Institution: Universidade de Aveiro/Aveiro University
- Academic Course: Engenharia Electrotécnica/Electrotechnical Engineering
- Thesis Title: Mercado Electrónico para Serviços de Teleradiologia/Electronic marketplace for teleradiology services
- Thesis Supervisor: Prof. Doutor Manuel Oliveira Duarte/Prof. Doutor José Luís Guimarães Oliveira
- Current Thesis Status: Officially concluded
- Thesis Final Grade: Approved

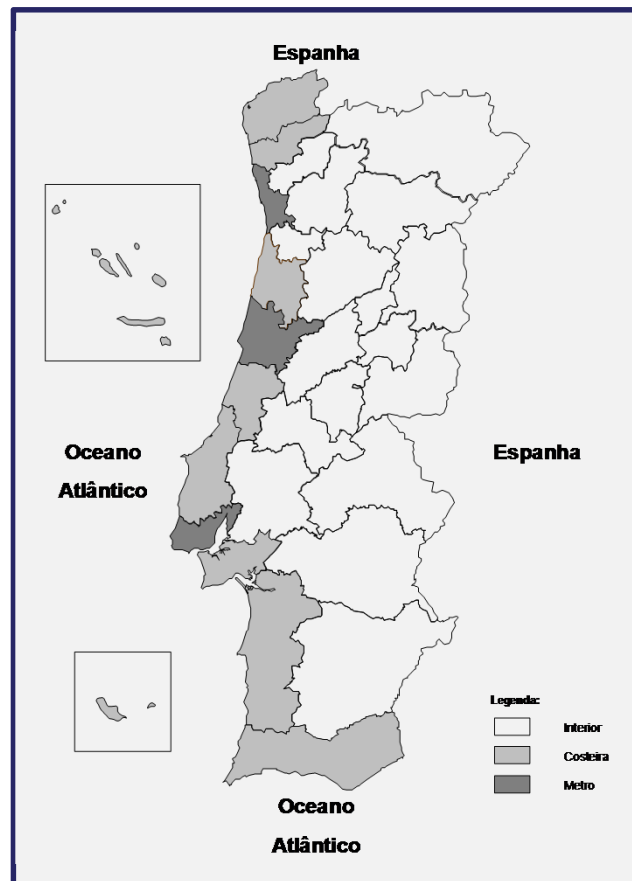

Problem identification (1/2)

Challenges and trends in teleradiology

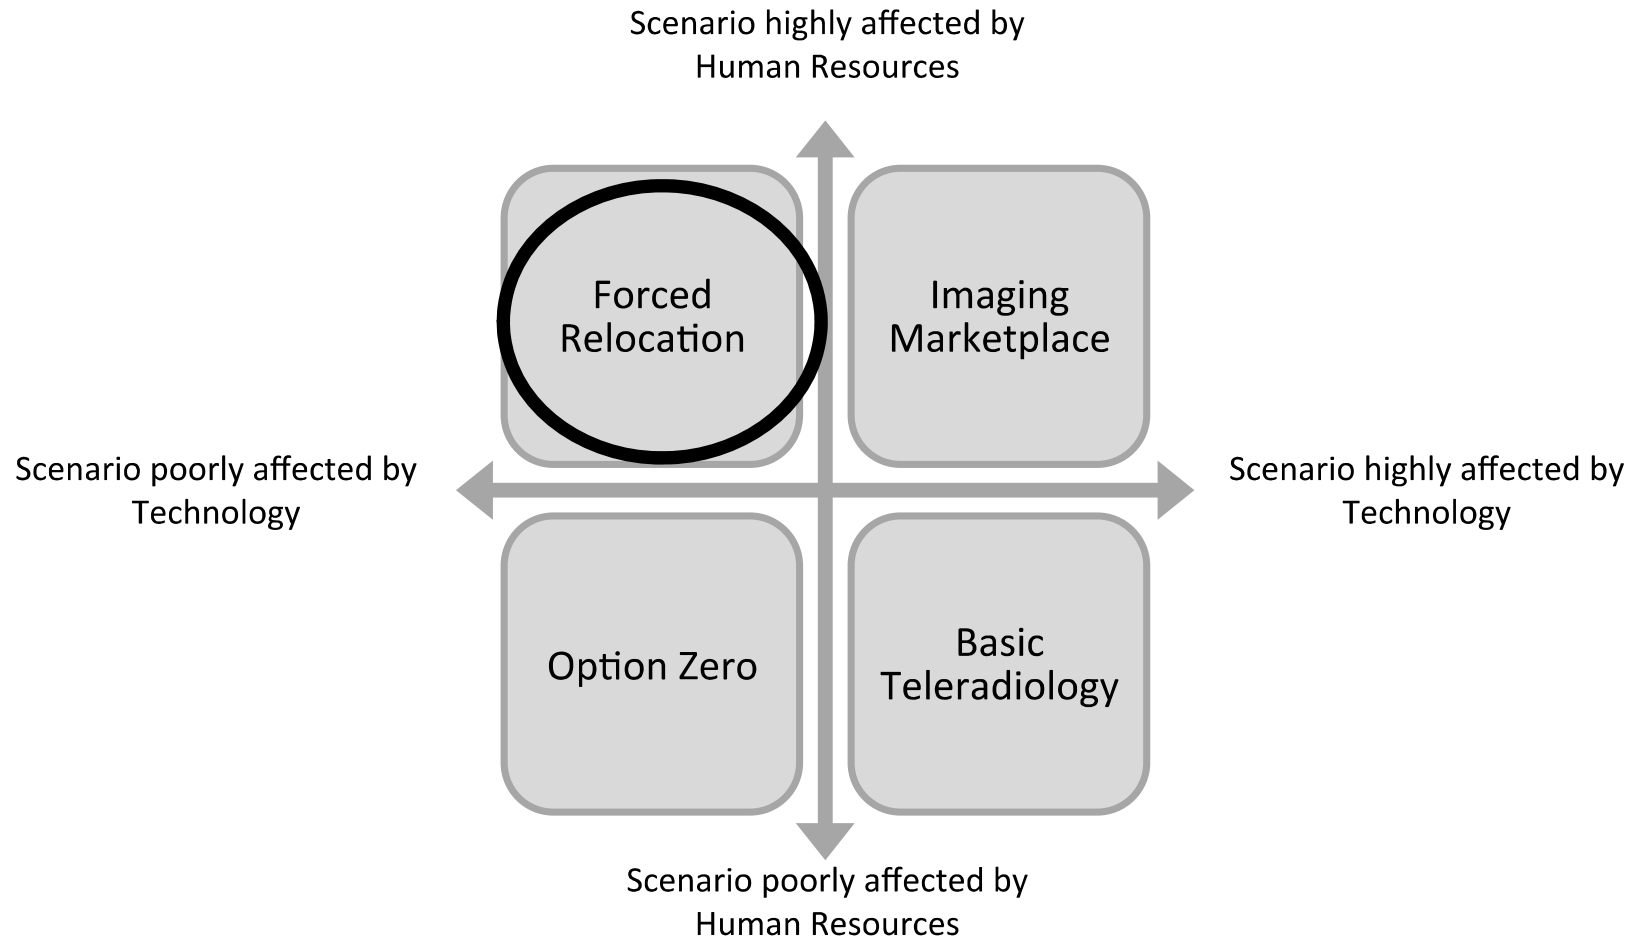

Problem identification (2/2)

Imaging Marketplace

	Pros	Cons	Balance
Availability	Interconnection between all institutions and all professionals		Positive
Costs	Reduction through bidding Exam dematerialization	Cost to design, implement, operate and maintain the system	Positive
Process Enhancement	Reduce duplicate exams Rational equipment use Speedier interpretation		Positive
Satisfaction	Choose the most suitable radiologist, fitting the exam to the interpreter		Positive (with the possible exception of the radiologists)

Relevant audience

According to Osterwalder's canvas business model

The Business Model Canvas

<p>Key Partners </p> <ul style="list-style-type: none"> - Partnerships for communication management - Partnerships for broker data center management - Management of evaluating and appeal teams 	<p>Key Activities </p> <ul style="list-style-type: none"> - Auction processes - Appeal processes - Evaluation processes 	<p>Value Proposition </p> <ul style="list-style-type: none"> - Access to radiology care - Swifter interpretation of the images - Enhanced patient treatment - Financial self sufficiency of the system - Enhanced productivity - Risk reduction on the acquisition of image interpretation 	<p>Customer Relationships </p> <ul style="list-style-type: none"> - Help desk 	<p>Customer Segments </p> <ul style="list-style-type: none"> - Radiologists - General Practitioners - Healthcare financing institutions (public and private)
	<p>Key Resources </p> <ul style="list-style-type: none"> - Broker platform management - Expert panel - Market regulation entities 		<p>Channels </p> <ul style="list-style-type: none"> - Only web based communication channels 	
<p>Cost Structure </p> <ul style="list-style-type: none"> - Software platform available to the users - Hardware/Software platform where data centre is based - Communication infrastructure, interconnecting users and data centre - Back-up and redundant systems 			<p>Revenue Streams </p> <ul style="list-style-type: none"> - One time revenues - Recurring revenues - Appeals and penalties for service level agreement unfulfil ent - Classification review of the selling radiologists - Users system integration and technical help desk service

Value proposition

According to Osterwalder's canvas business model

- The implementation of the proposed system (currently implemented as a prototype) will:
 - Improve accessibility to radiological services by the population;
 - Improve speed and reduce costs involved in processing the radiological images;
 - Reduce risks involved in the acquisition of imaging interpretation services;
 - Optimize imaging equipment productivity;
 - Enable, through a benefit redistribution among the participants, the financial self-sufficiency of the system.

Future work

- Improve auctioning mechanism according to the requirements of the end users, namely optimizing the submission process from a “one-by-one” submission to an “en masse” submission process

- Improve system scalability when subject to the use by a large number of customers;

- Create a single user repository at European level, enabling the requirements of the “Cross Border Healthcare” Directive 2011/24;

- Implement the business plan attached to the thesis, managing the marketplace during 5 years.
 - Very conservative approach
 - Expected NPV 141.107€
 - Expected IRR 10,18%
